C. William (Bill) Bayliss is a first generation farm owner/operator who utilized a USDA farm ownership loan for the first farm purchase in 1971. Wigwam Enterprises is a joint venture with Bill, his daughter and son in law, Jana and David Caudill, consisting of a grain farming operation, a Polyvinyl fence/deck/railing business, and a small cow calf herd. Located in West Mansfield, Ohio they produce soybeans, tofu beans, low linolenic beans, wheat, corn, and alfalfa hay on 2000 acres. A portion of the acreage has been transitioned into organic production. While operating the family farm, Bill also worked as a USDA/Farm Service Agency County Executive Director in Ohio for 21 years before returning to the farm full time. Later he was appointed to serve on the Ohio FSA State Committee for two years. He is currently the Association of Agriculture Production Executives 2009/10 President and has been a Heartland Research Group Member, for the 2007 Farm Bill policy recommendations committee. He served as the Young Farmers Association Nat'l Institute Tour Chairman, and Ohio Young Farmers Association Past State Vice President. He graduated from The Executive Program for Agriculture Producers, Texas A&M: The USDA Management Training Course for Executive Directors: and The Ohio State Rapid Adjustment Farm Program. He has received the Lions Club International, Melvin Jones Fellow, for Dedicated Humanitarian Services and the Ohio Young Farmers Association, Community Service Award.

My brother and I manage and operate a 500-acre vegetable-grain operation located in Middletown, DE. The name of our farm is Lazy Boy Farm, Inc. Our primary crops are white potatoes and bulk green cabbage. We use wheat and soybeans as rotational crops. My responsibilities range from financial management, crop planting and management, packing shed operations and labor recruiting to tractor driving and field work. Distribution of our products is through brokers and direct marketing. We start our season by starting our own cabbage transplant plugs in February and end with soybean harvest in November.

Agricultural Consulting Services is one of the ten largest independent crop consulting services in the United States. We are a Rochester NY based company that has been committed to helping farms across New York State and much of the Northeast for nearly 25 years. Our growth is a result of our unbiased integrated approach to crop management with a focus on our client's needs and business objectives. We offer comprehensive services, from farm management tools to environmental counseling and engineering. We draw on our many resources to provide the optimum solution each client is looking for. Our clients range from dairy producers, row crop farmers, vegetable growers and the food processing industry. Our approach is to build a close working relationship with our clients and become a valued part of their management team. We view our job as providing our clients with the most advanced technologies and procedures available to enhance their business and improve their profitability.
